Bhasha Setu Updated Version - New Features Implementation

Bhasha Setu - Updated Version Report

Date: October 26, 2026
Project ID: f77ff3d8-0b59-549e-8d7a-a12c7f572688
Live Application URL: https://telugu-hindi-voice-bridge.lovable.app (https://telugu-hindi-voice-bridge.lovable.app/)
Project Owner: MUKUNDASNAYAK TEJAVATH

New Features Implemented in This Update

1. 3D Natural Audio Voices

- Added distinct male and female high-fidelity voice options using ElevenLabs TTS integration.
- Users can now choose between natural male and female voices for both Telugu and Hindi playback.
- Voice selection toggle added in settings panel.

2. Side-by-Side Dual Translation Boxes (Retained and Enhanced)

- Kept the modern side-by-side layout for Telugu and Hindi boxes.
- Enhanced with smooth animations and better responsive design.
- Inline speaker icons in each box for instant audio playback.

3. Telugu to Hindi Translation Flow

- When user speaks or types in Telugu, translation appears in Hindi script in the right box.
- Real-time translation using server-side engine.

4. Below Telugu Letters (Transliteration)

- Added real-time Telugu phonetic transliteration below the input Telugu text.
- Example: If user types "నమస్తే", below it shows the Telugu pronunciation guide.

5. English Pronunciation Guide

- English phonetic transliteration shown below the translated Hindi script.
- Example: When Hindi text "नमस्ते" displays, below it shows "namaste".

6. Example Demonstration

- Input: "Hi" or "నమస్తే"
- Output in Hindi box: "नमस्ते"
- Below Hindi: "namaste"
- Below Telugu input: Telugu pronunciation if applicable.

Technical Updates

- Integrated ElevenLabs for 3D natural voices.
- Enhanced React components for side-by-side boxes with TypeScript.
- Updated pronunciation.ts for Telugu and English transliteration.
- Improved Web Speech API handling.

Next Steps

- Full PWA mobile styling.
- Official branding update to Bhasha Setu.
- Testing and deployment.

Generated as updated implementation guide.
